

Measure anything using this wildlife scale
(e.g. how many snails fit on a leaf?
Or measure a car in worm lengths?).
Write your observations on the reverse side.

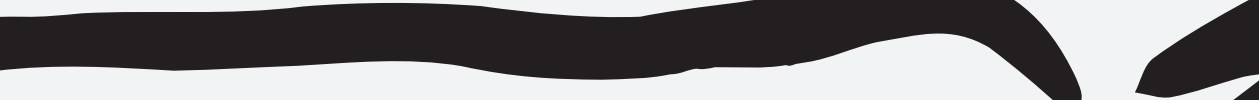

rat hind foot (45mm)

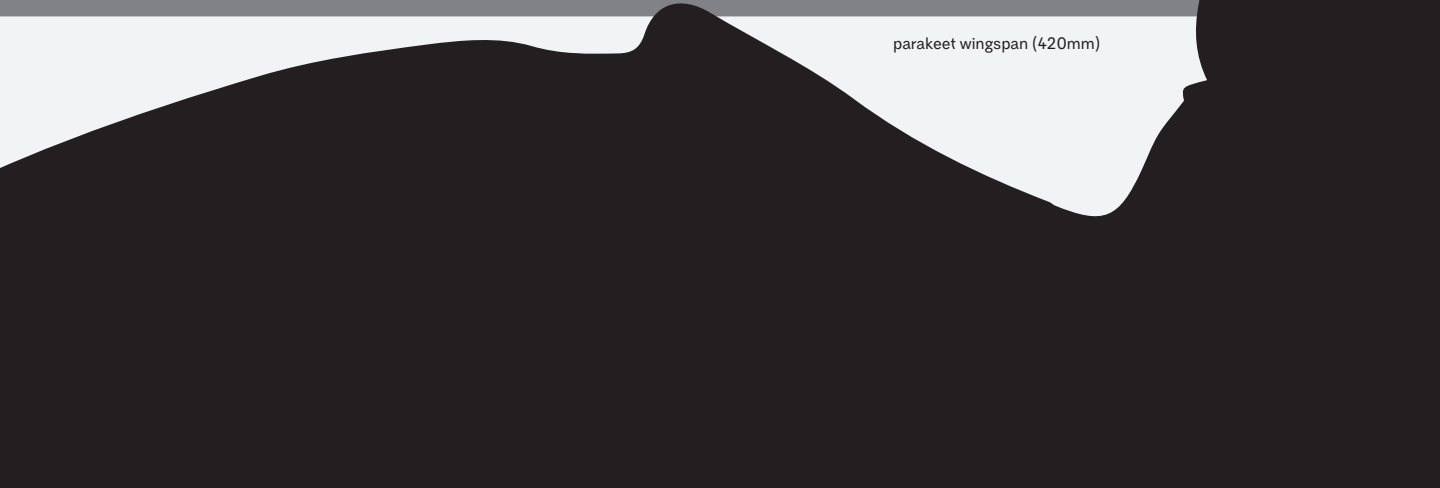

fox front foot (50mm)

earthworm (200mm)

parakeet wingspan (420mm)

cabbage white butterfly wingspan (63mm)

blue tit wingspan (180mm)

queen bumble bee wingspan (36mm)

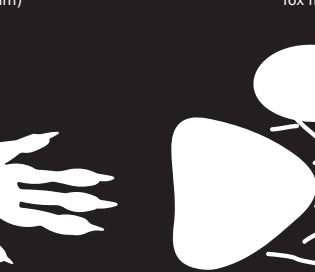

garden snail (80mm)
